

Everlast Deluxe Tanks

Everlast Deluxe Tanks

Extra Features

The **Everlast Deluxe** transportable tank has all the benefits of the Everlast Standard tank, namely, factory price, hassle-free installation, fire-survival and vandal resistance, as well as offering the following additional benefits to urban and residential customers.

Make Yours a **Five-Star Home**

Victoria has taken a **Five-Star** lead in the crusade for sustainable energy. New homes in Victoria must achieve a 5-Star level of energy efficiency. Other States will doubtless follow. When you build your home, build towards a sustainable environment and install an **Everlast Deluxe** water storage tank.

From July 2005, compliance with 5-Star has required a 5-Star energy rating for building fabric **PLUS** water savings measures. An **Everlast Deluxe** rainwater tank will provide those water saving measures and get you those 5 Stars.

Cool, Clear Water

Rainwater can provide a renewable supply of natural, soft, clear and odourless water that is great for drinking, washing, bathing and laundry. Water collected in correctly installed and maintained rainwater systems produces the safest drinking water for your family.

Take control of the water your family drinks and then protect your family's valuable water from algae and other pollutants in an enclosed **Everlast Deluxe** concrete tank.

Garden Fresh

Does your garden suffer when water restrictions are imposed? Why look out over dead lawns and withered plants when the answer is as simple as ordering an Everlast Water Tank?

Hook up your **Everlast** tank to your gutters and direct life-giving roof water to those thirsty plants. Enjoy a lush garden without fear of water restrictions or penalty water rates.

Help the Environment

Water is very valuable but rainwater is extremely precious.

If your reticulated water supply is salty or hard; emits odours or contains heavy minerals, why not relegate it to flushing your toilets, washings cars and watering the garden? Install an **Everlast Tank** and use natural, soft, good quality rainwater for your personal use.

If you live in a high rainfall area or have a large roof catchment, why not really help the environment by using rainwater for all your needs.

Smart Urban Appearance

The one-piece construction of the **Deluxe Tank**, with no joints and stronger concrete roof, allows for in-ground installation. If space is a premium, or your views are limited, why not assist your landscaping by installing your tank in-ground with only the tank roof showing, providing an excellent paved area on which to site your garden furniture or clothesline.

When used as an above-ground tank, the Everlast Deluxe tank is available in a choice of colours and quality fittings to compliment your property.

Australian Codes

The **Everlast Deluxe Tank** is designed to Australian Code AS 3735 "Concrete Structures for Retaining Liquids".
