

Everlast Utility Cabins

Everlast Utility Cabins

Cut On-Site Labour Costs

The cost of on-site labour is cut to the bone with a ready-to-use **Everlast Utility Cabin**. Install a factory-built Everlast Cabin on your work site and slash delays from bad-weather, slow deliveries, material supply or labour problems.

Everlast Utility Cabins are pre-fabricated concrete lock-ups of all shapes and sizes that are delivered to your site ready-to-connect with any required service. Once on-site, no further construction work is required to bring your **Cabin** into service.

Buy factory-built and count the savings in time and money.

Low Maintenance

The **Everlast Cabin** is a fully-engineered, robust, concrete construction designed to give many years of durable service.

Fire-Proof

All **Cabins** are constructed from fire-proof materials to relevant Australian Standards.

Strong and Durable

Twenty years of continuous product development, design improvement and client feedback has given Everlast unsurpassed experience in the design, manufacture and delivery of strong, long-lasting transportable concrete **Utility Cabins**.

Roxburgh Park

Relocatable

Everlast Utility Cabins are specifically designed as transportable units that can be set down, picked up and relocated with the minimum of fuss.

Vandal Resistant

A tool shed or equipment store left in an isolated location is a tempting target for vandals and thieves. Robust construction and Everlast attention to detail with door and window furniture will thwart even the most-determined break-in.

Supplied to the Government

Everlast regularly supplies **Cabins** to government departments and municipalities. Engineering drawings and specifications are provided for construction approval and permit applications.

Custom Built

Everlast Utility Cabins can be custom-built to suit your specific needs. Cabins have been used for work huts, equipment stores, pump houses, temperature controlled instrument stations, dangerous liquids stores with chemical bunding, toilet blocks and bus shelters – the list continues to grow as more and more organizations turn to Everlast to custom-design the solution to onsite safe-storage problems.
